EDUCATION

University of California, Santa Cruz

Bachelor of Science in Computer Engineering

Santa Cruz, CA

Expected Jun. 2030

Awards: 3rd Place at LancerHacks VII; Best Website at Berkeley ANova Hacks; CodeForCause at Milpitas Hacks; Finalist / Best UI/UX at HackaKhan.

Interests: Eagle Scout; Taekwondo instructor for 4+ years; Carnatic vocalist with 20+ performances at local centers.

TECHNICAL SKILLS

Languages & Development: Python, JavaScript, HTML/CSS, C++, MATLAB, React, Node.js, Full-Stack Development, UI/UX

AI & Systems: LLM Integration, MCP, Neural Networks, Claude, Prompt Engineering, Raspberry Pi, CARLA, PID Control, Waypoint Navigation

PROFESSIONAL AND LEADERSHIP EXPERIENCE

RANDLab, UC Santa Cruz

Undergraduate Researcher

Santa Cruz, CA

Sep. 2026 – Present

- Investigated censorship devices across **23+ countries** through network measurement and traffic analysis to characterize connection tampering and deep packet inspection.

True Fit

AI/ML Engineer

Remote

Jul. 2025 – Nov. 2025

- Integrated **8 MCP tools** into server architecture, connecting LLM workflows to application data and services for e-commerce recommendations.
- Improved clothing-discovery personalization by **25%** by integrating **4 LLM-powered recommendation features** tailored to shopper preferences.
- Enabled interactive clothing exploration across **50+ product views** by developing responsive e-commerce interfaces using Three.js.

Association for Computing Machinery (ACM)

Lead Hackathon Coordinator

Santa Cruz, CA

Oct. 2026 – Present

- Coordinated logistics, technical programming, and outreach for **100+ participants** and **30+ teams** at a hackathon sponsored by Cisco, Google, and Baskin Engineering.
- Hosted **30+ technical workshops** with ACM officers and mentors to prepare students for hands-on development and collaborative projects.

HelpingHands

Web Developer

Remote

Aug. 2023 – Present

- Developed **17 web and mobile workflows** through full-stack and UI/UX engineering for a crowdfunding platform supporting underprivileged children in Chennai.
- Helped raise **\$3,000+** through the platform, supporting cause-specific fundraising with an intuitive web and mobile experience.

PROJECTS

Autonomous Racing Agent | Python, CARLA, PID Control

Jun. – Jul. 2025

- Built a Python driving agent for UC Berkeley's ROAR competition, implementing waypoint navigation to complete laps on the Monza v1.1 simulated track.
- Reduced off-track incidents by **30%** through PID tuning and real-time telemetry analysis, improving the agent's driving stability.
